IVRI-Artificial Insemination App: IVRI-Artificial Insemination App has been designed and developed by ICAR-IVRI, Izatnagar in collaboration with ICAR-IASRI, New Delhi under CAAST-Advanced Center for Livestock Health, NAHEP. It is an hybrid App for Android platforms. The App is targeted to provide knowledge and enhance the skills of graduating veterinarians, field veterinary officers and paravets about various aspects related to Heat detection & Artificial Insemination (AI) viz., symptoms of heat, stages of estrus cycle, heat detection, AI kit, proper time of AI, common sanitary measures, thawing, loading of AI gun, semen deposition and post AI advise & follow-up. Additionally, the App provides guidelines for semen handling and pregnancy diagnosis in cattle and buffaloes. The App also provides detailed information about the Frozen Semen Stations in India along with the availability of semen of various breeds of cattle, buffaloes and crossbreds. Educational videos on various methods of use of Crystoscope and teaser bulls for heat detection besides AI techniques have been included in the App for enhancing the skills of the personnel involved in AI. The App has an additional feature of record keeping for supporting the Veterinarians and paravets for keeping record of AI services done and their effective follow up which requires online mode . The App is presently in English and Hindi language. Its present size is 4.6 MB. The App is available for free at the Google Play store.

Features of the App

- It is an offline App developed for Android platforms.
- The App was first placed on Google Play store on 6th March, 2018 and latest updated on 19th July, 2019.
- Its present size is 4.6 MB.
- The App provides information in Hindi & English languages
- The major users of the App are the Graduating Veterinarians, Field Veterinary Officers and Livestock Entrepreneurs.
- The App would help the end users to learn more about the heat detection in cattle and buffaloes and the Artificial Insemination technique.
- Educational videos on Heat detection in Animals using Crystoscope (English & Hindi) and Artificial insemination in Dairy animals (English & Hindi) are linked to the App for enhancing understanding.
- Further, record keeping function support the end users to enter AI related case data and provides them help for further follow up of the cases.

IVRI-Pig Ration App: IVRI-Pig Ration App has been designed and developed by ICAR-IVRI, Izatnagar in collaboration with ICAR-NRC on Pig, Guwahati & ICAR-IASRI, New Delhi for Android platforms under CAAST- Advanced Center for Livestock Health, NAHEP. The App is targeted to impart and promote scientific knowledge and skills about balanced pig ration formulation. Imbalanced feeding to pigs is a major problem in field condition. Majority of the piggery owners feed their pigs based on their traditional knowledge and information passed through generation to generation with locally available feed ingredients. Animals on such imbalanced ration show poor health, growth and reproductive performance thereby causing high cost of meat production. The IVRI-Pig Ration App can help the end users to formulate balanced ration for the various categories of pigs based on the locally available feed ingredients. The App additionally provides for nutritional composition of various feed ingredients that can be used in pig ration alongwith ready diets for different categories of pigs. Use of this mobile App for balanced pig ration can help to enhance the profitability of the piggery enterprise. Its present size is 8.7 MB. The App is available for free at the Google Play store.

Features of the App

- It is an offline App developed for Android platforms although for ration formulation will need online mode.
- The App was first placed on Google Play store on 28th Sept., 2018 and latest updated on 6th Nov. 2018.
- Its present size is 8.7 MB.
- The App provides information in English, but very soon the Hindi version will be made ready.
- The App is targeted to impart scientific knowledge and skills to the Graduating Veterinarians, Field Veterinary Officers, Developmental Organizations and Entrepreneurs for promoting balanced ration formulation for piggery enterprise.
- Imbalanced feeding to pigs is a major problem in field condition. Majority of the piggery owners feed their pigs based on their traditional knowledge and information passed through generation to generation with locally available feed ingredients. Animals on such imbalanced ration show poor health, growth and reproductive performance there by causing high cost of meat production.
- The IVRI-Pig Ration App can help the end users to formulate balanced ration for the various categories of pigs on the basis of their body weight, age, pregnancy status, lactation stage and requirement of breeding boar. Different feeding regimes have been provided in the App depending upon the availability of locally available feed ingredients. The users of this mobile App are advised to adjust the quantity of locally available cheaper feed ingredients offered to their animals along with mineral mixture and common salt for optimizing the meat production economically.

आईवीआरआई–पिग राशन ऐप

- भाकृअनुप–भारतीय पशुचिकित्सा अनुसंधान संस्थान इज्जतनगर, उ०प्र० और भारतीय कृषि सांख्यिकि अनुसंधान संस्थान पूसा, नई दिल्ली तथा राष्ट्रीय शूकर अनुसंधान केन्द्र, गुवाहाटी के सहयोग द्वारा विकसित, आईवीआरआई–पिग राशन ऐप एक ऑफलाइन ऐप हैं।
- यह ऐप संतुलित शूकर राशन निर्माण के बारे में वैज्ञानिक ज्ञान और कौशल प्रदान करने तथा शूकर पालन को बढ़ावा देने के लिए उपयोगी है।
- शूकरों को संतुलित भोजन देना एक बड़ी समस्या हैं। अधिकांश शूकर पालक पारंपरिक ज्ञान के आधार पर शूकरों को असंतुलित राशन देते है जिससे शूकरों में खराब स्वास्थ्य, मंद विकास तथा प्रजनन संबंधी समस्याएँ हो जाती हैं।
- आईवीआरआई– पिग राशन ऐप उपयोगकर्ताओं को स्थानीय स्तर पर उलब्ध सामग्री के आधार पर शूकर की विभिन्न श्रेणियों के लिए संतुलित राशन तैयार करने में मदद कर सकता है। ऐप अतिरिक्त रूप से शूकरों की विभिन्न श्रेणियों के लिए तैयार आहार की जानकारी प्रदान करने के साथ ही अलग–अलग प्रकार के चारा सामग्रियों की पोषण संरचना की जानकारी भी प्रदान करता हैं।
- इस ऐप का कुल परिमाण 8.7 एमबी है।
